

ITP-PANORAMA

Unique facts at a glance

ITP Software
Systems Ltd.

Master your software with ITP-PANORAMA

www.itp-panorama.com

What do you get from ITP-PANORAMA?

- A real time documentation of complex, heterogeneous IT systems
- Productivity and efficiency for maintenance and modernization
- Support for all common operating and target systems
- The fastest scanners for all common programming languages (Assembler to JAVA, C#)
- Use of modern OLAP HyperCube Technology
- A real Client / Server Implementation
- For ten years the HyperCube has resided in-memory on the server
- Analysis uses up to 16 processors simultaneously in one search
- A HyperCube Repository can be built from tens of millions of LOC
- No software and or license is required on the Client

- Support for hundreds of developers
- Minimal administration / Marginal traffic load on the network
- No risk to the working system by running on a dedicated Server
- Every detail becomes a search criteria that is related with all usages
- What you cannot find in a second does not exist in the code

- Daily update of repository possible because of high speed scanning (Less than 90 minutes for 30 mill. LOC of Cobol code)
- Selections by mouse click or REGEX wildcard
- Response time on average is less than one second
- All data in the HyperCube is always visible; with the selected criteria highlighted
- Search results that are always 100% comprehensive and correct
- The first project is scanned into the HyperCube in one day
- Easy to learn environment where training needs only four hours
- Mature solution; in use at major IT users since 2000
- Customers that are active reference sites

ITP-PANORAMA can make your software transparent. With each scan, all of your programs will be compiled and all dependencies and links checked across all applications. You will be surprised how much more you can learn about your software.

A 30 day trial period with five concurrent licenses will take away any risk before you decide to buy and will prove all of the above statements.
